

# JAMMERS

**Spy Camera Room Jammer- Model: SCRJ**  
 SCRJ utilizes unique and intelligent technique that Jams wireless signal communication transmitted secretly between Spy Camera and the Audio Video transmitter.

The **Cell Phone Jammer** is an instrument used to prevent cellular phones from receiving and transmitting the mobile signals to a base station. When the Jammer is used it effectively disables mobile signals in the area. These devices can be used in any location, but are found primarily in locals where a phone call would be particularly disruptive. These include churches, mosques, libraries, movie theaters, meeting rooms, and other places where silence is expected

## Specifications

Jamming Frequency
835 - 894 MHz
935 - 960 MHz
1805 - 1880 MHz
Jamming Interface Standards
Digital: TDMA, CDMA, GSM
Analog AMPS, NMT, N-AMPS, TACS
Output Power
EACH BAND :
10MW/20MW/50MW/100MW/250MW/500MW/1W/
5W/10W/15W(Customized)
Signal Source
White Noise
Antennas
External Omni directional
All the TX frequency covered down link only
External Switching Power Supply
50/60Hz/AC 100- 240V convert to DC 12V
Jamming Range
Radius 2M – 1KM RANGE
Dimension
Depends on the total out put power small size
